

## SWEDFLIGHT FREEWARE - ESMR Trelleborg-Maglarp

### Activation of the scenery

To match the other airports from Swedflight you might already have or will get, the following directory structure is adhered to, where ESxx is the directory for the actual airport you have installed – in this case ESMR. The folder FS2004 is of course the existing one for the Flight Simulator wherever you have placed it.

The procedure is exactly the same in FS2002. If you run both simulators you can keep the scenery in one of them (to save space on the disk) and point to that location in the Scenery Library when you activate the scenery.

Make activation like this:

1. Start FS2004 and go to the menu Setup/Scenery Library.
2. Click on the button ADD AREA in order to include ESMR in the database of the simulator.
3. Click on 'Select scenery directory'
4. Search for the directory SwedflightFree\ESMR and click on that.
5. Press OK - reboot and the scenery is installed !

**With this simple procedure ESMR is now activated in FS2004 and can most easily be reached via the menu World/Goto Airport/ Search Airport IDs where you write ESMR and press Enter.**

NOTHING must be written in the file Scenery.cfg

**To get the most natural look from the forests that surround the airport please set the Autogen effects to Very Dense in Options/Settings/Display/Scenery/Autogen Density.**

**IMPORTANT!!** Note that Microsofts version of the start position for ESMR (which is used by FS2002/FS2004) is totally wrong and is derived from an older position of the airport. We are using the right coordinates in the scenery which means that the start position doesnt fit the reality. After the installation we advice you therefore to make a new start position and save it as a 'Flight' of your own. You will easily find the field a little to the North from the original start position – look for the wind generators close to the runway when you slew around.

**Recently the airport has in the real world again been moved to a third location – now to a new site in Vellinge community.**
